

COQA Recommended Specifications

- In order to better define the quality of WTI, in a letter dated 10 August 2010, the COQA recommended the following specs be added:
 - MCRT: 2.4% wt. or less
 - TAN: 0.28 or less
 - Nickel: 8 ppm or less
 - Vanadium: 15 ppm or less
 - Light Ends <220°F by HTSD: Not more than 19% by mass
 - 50% Point by HTSD: 470°F- 570°F
 - Vacuum Resid > 1020°F by HTSD: Not more than 16%
